Managing Director

### *move [muv]*

1. to go in a specific direction, to change position
2. to change or to cause the change of a state, opinion or activity
3. to progress

### *movens, moventis (pp of Latin *moven*)*

1. to set in motion
2. to determine to, to push to
3. to cause, to provoke
4. to stir up, to agitate (ideas)

### *team [tim]*

1. one or more people working together
2. (*team up*) to work together to achieve a shared objective, to associate skills, to collaborate

→ **Increasing the competitiveness of companies by transforming their industrial system into a real competitive advantage**

**moventeam** is for directors and managers of operations who are seeking:

- a major improvement in their company or sector,
- a single contact for their industrial problem.

We offer complementary services in the following fields:

- **operational consultancy,**
- **engineering assistance,**
- **and training.**

We operate **to improve the existing as well as to create new industrial systems and/or associated products.**

Increasing your potential

## An overall vision...

**moventeam** acts on the entire life cycle of the industrial system: upstream on the industrial strategy and organisational decisions, during deployment and industrialisation phases or during operations. .

We take into account transversal aspects, which represent key performance factors: guiding people, providing training and the associated industrial information systems.

*We thus act in a coordinated manner on all performance levers at the same time: techniques, organisation and methodologies, people and management.*

Each of our team members has an industrial background, enabling them to approach and **understand your company as a whole**. They have faced the same problems as you in the same industrial context. **You will be working with and talking to industrialists.**

**moventeam** has chosen to gather together complementary skills and know-how to act on the entire industrial process: coordination and support, development and design, supply chain, manufacturing and facilities

## ...to understand...

Our approach is based on **simplicity, pragmatism** and is **without pre-conceived** solutions or methodologies. One of the foundations of our mission as consultants is to ensure actual, real application in the field, based on action and sharing with all levels, from operational personnel to the Managing Director.

## ...and to act

Our **various types of intervention** are designed to satisfy different concerns:

- diagnosis / study / audit / expertise
- assistance and practical guidance in implementation
- project management / assistance to the instructing party
- practical training and knowledge transfer.

To ensure that we provide the best response to your expectations and requirements, we will decide together on the **scope of our intervention**:

- coaching
- assistance
- coordination
- completion
